📝 <https://medium.com/@atakan.reyhanioglu>

I enjoy working with the latest technologies so that I can shape a user's experience with software. It is my passion to do things that make differences at the point where software touches a person. Thanks to my self-motivation and curiosity, never stop learning and developing.

## EXPERIENCE

MAY 2020 – MARCH 2022

FULLSTACK DEVELOPER

Rh Pozitif

<https://rhpozitif.com>

Rh+ is a Turkish online education company, which focuses on providing language kinds of examinations for the national market. Many bug fixes have been made on the server and client side. Developed RESTful web services. Worked to identify which new technologies and packages would be best used in a variety of projects to help move them forward. Researched, tested, and evaluated new technologies, software packages, and hardware products for use in various projects.

- NodeJS, VueJs, PostgreSQL, MongoDB
- Google, S3, FireBase, Cloud Function, Cloud Run.
- Used Docker for development and production.

## PROJECTS

Rh Pozitif – Tiwiser App, Virtual Classroom
